

Hazardous materials are part of everyday life

Everyday life relies on the use of hazardous materials - from cleaning products and gardening supplies to automotive fluids, dry cleaning solvent, photo film developer, and chemicals used in industry. Santa Clara is one of few cities in the U.S. to have chemists on staff in the Fire Department to monitor the safe storage, handling and use of chemicals. There are more than 900 facilities in Santa Clara that use chemicals in some way. They might be semiconductor chip or circuit board manufacturers, medical offices, machine shops, or schools.

All members of the Fire Department are trained to respond to hazardous material spills, and a chemist is always on call to aid in the response. Individual households also help protect the environment by participating in the Household Hazardous Waste drop-off events that are scheduled throughout the year, and by keeping chemicals such as pesticides and herbicides out of stormwater drains which flow to San Francisco Bay.

A photograph showing a firefighter in a red hazmat suit standing next to a fire truck. The truck has "SANTA CLARA" written on its side. Another firefighter in a blue shirt and tan pants is visible in the background. The scene is outdoors, likely at a hazardous waste drop-off event.

FEBRUARY 2008

An aerial photograph of a city, likely Los Angeles, showing a dense urban area with a mix of residential and commercial buildings. In the background, a range of mountains is visible under a clear blue sky. The image is partially obscured by a dark, semi-transparent overlay on the right side, which serves as a background for the title text.
